The Federal Communications Commission is considering taking actions that will restrict consumer choice **by** deregulating local phone service.

Millions of Americans like me could have their phone service threatened if the local phone companies aren't required to allow competitors access to the market. I'm also concerned about the Commission's move to relieve all broadband Internet access facilities of open access obligations.

Both of these key decisions will limit my choices as a consumer **by** lessening competition, diminishing cost savings and threatening consumer protections. **As** a constituent, I urge you to support competition and open access for local phone service.

Sincerely,

Mary Kinser

Subject: Triennial Review

Dear Commissioners: I implore you to leave line sharing as it is. Please **do** not allow the RBOC's to delude you that elimination of line sharing will cause a return of capital spending by the RBOC's. This is an absolute fallacy. All that it will accomplish is the elimination of competition for the RBOC's. It is apparent to most lay people that the RBOC's will not install a fiber optics network to homes. It is too expensive. Therefore, the argument that they will **do** so appears to me to simply to **be** a subterfuge to persuade the Commission to eliminate line sharing. I sincerely hope that the Commission is smart enough to see through this sham. Respectfully yours. Melvin E. Weinstein

Subject: NO TO MONOPLYS

I am a consumer and a voter and I am appalled by the fact that you are considering taking away an essential part of the system that keeps a healthy competitive market. I am wondering if you are communist or are against a capitalistic market because this proposal that's being suggested would be forcing the market away from what works and benefits all.

So, if you aren't just going to pass this proposal in order to benefit yourselves and you really are considering the best choice you will reject the idea of eliminating the UNE-P.

Subject: UNE-P

Dear FCC Commissioner:

Elimination of competitive access to wholesale phone networks will kill local competition and leave consumers with the worst of both worlds, an unregulated monopoly. Please reject the Bell's self serving proposals to eliminate the UNE-Ps. which would pave the way for a bigger, meaner phone monopoly unrestrained by regulatory oversight. Please be sure they are NOT eliminated.

Sincerely,
Michael Ude

Subject: Please Minimize Deregulation

A free society is based on availability of diverse information. Radical deregulation may speed technologic development, but limit information sources to a few companies. They may show diversity in content, e.g. oldies, sports, drama, but it remains the output of super-large corporations. If we trust Adam Smith, increased demand will eventually fuel technologic development, even if improved profitability (with later increased consumer costs due to oligopoly) may spur development sooner. My vote is to preserve competition by SLOWING DEREGULATION. Sincerely, Stephen R. Cann, M.D.

Subject: Line Sharing

Mr. Powell -

Please keep line sharing as **is**

Eliminating line sharing will lead to less choice and competition, and higher prices for consumers and small business for broadband services.

It also would slow the penetration of broadband services across the country delaying key benefits that can help the economy

Thank You,

Olin Broadway
Concerned CLEC Broadband Customer
